

Swiss chemical ecology meeting: past, present and future

Matthias Erb

Institute of Plant Sciences, Biotic Interactions, Altenbergrain 21, 3013 Bern, Switzerland
matthias.erb@unibe.ch

Ted Turlings is a pioneer and a true giant in Chemical Ecology. His work has shaped the past, present, and future of the field, both in Switzerland and globally. To celebrate his achievements and “retirement” (in name only), I will briefly present his career and major contributions. I will also share some anecdotes and personal experiences with Ted as a mentor, colleague, and friend.
